

Dear TerraLink customer,

RE: Canadian Restricted Components Legislation (ammonium / potassium nitrate and hydrogen peroxide)

As of March 1st 2009, the Explosives Regulatory Division (ERD) of Natural Resources Canada (NRCan) will not permit the sale of Ammonium Nitrate, Potassium Nitrate or Hydrogen Peroxide to any customer unless they provide a photo copy of government issued photo ID (Driver's Licence or Passport), Business Licence or Certificate of Incorporation to TerraLink.

TerraLink is therefore requesting that you send a photocopy of one of the above forms of I.D. to TerraLink. This will help us provide seamless service to your business. Please send your photocopied driver licenses via regular mail, as they do not fax well. The remaining forms of identification may be faxed to the attention of Regulatory Affairs.

TerraLink - Regulatory Affairs

464 Riverside Rd., Abbotsford BC, V2S 7M1

Thank you in advance for your prompt responses, as they will help keep our industry in compliance.

Kindest regards,

Regulatory Affairs

TerraLink Horticulture Inc.

TerraLink privacy policy: TerraLink will not use or pass on your identification or any part of it, at any time other than to prove to the administrator of the restricted components legislation, that TerraLink has fulfilled its legal obligation under this legislation.
