### Benefits:

A high organic based, controlled release fertilizer designed for use on golf course fairways, landscapes and sports fields throughout the spring and summer months. Contains 53% controlled release nitrogen from U Flexx stabilized urea and Organics. Stabilized urea minimizes urea volatilization and nitrate leaching, leaving more available nitrogen to turfgrass uptake. Use of controlled release nitrogen via U Flexx and Organics results in minimal surge growth and prolong colour response for up to 10 weeks. Potassium level assists turf in summer heat tolerance, winter cold tolerance plus disease resistance. Organics enhance microbial activity which in turn reduces the incidence of turf grass disease. Contains Iron which assists in chlorophyll production and subsequent colour response.
