Benefits:

A high nitrogen, controlled release fertilizer designed for use on golf course fairways, landscapes and sports fields throughout the spring and summer months. Contains 60% controlled release nitrogen from U Flexx stabilized urea. Stabilized urea minimizes urea volatilization and nitrate leaching, leaving more available nitrogen to turfgrass uptake. Use of controlled release nitrogen via U Flexx results in minimal surge growth and prolong colour response for up to 10 weeks. Potassium level assists turf in summer heat tolerance, winter cold tolerance plus disease resistance. An economical summer fertilizer due to its low application rate.
