 Phosphorus: Mono-Ammonium Phosphate
 Potassium: Muriate of Potash, Sulphate of Potash

Benefits:

A high potassium, controlled release fertilizer designed for use on golf course fairways and sports fields throughout summer and fall months. Contains 55% controlled release nitrogen from Methylene 75 (methylene urea) and U Flexx stabilized urea. Methylene 75 gradually releases nitrogen to turfgrass up to 14-16 weeks. U Flexx stabilized urea reduces urea volatilization and nitrate leaching. Use of controlled release nitrogen results in minimal surge growth and prolong colour response. High potassium level assists turf in summer heat tolerance, winter cold tolerance plus disease resistance. Late fall / dormant winter applications result in carbohydrate production and storage which creates strong spring regrowth.

Application Rates:

To supply 0.75 lbs of actual N/1000 sq.ft apply product at 4.2 lbs/1000 sq.ft.
