 Potassium: Muriate of Potash

Benefits:

A high potassium, controlled release fertilizer designed for use on golf course fairways and sports fields throughout late summer and fall months. Contains 65% controlled release nitrogen from U Flexx stabilized urea. Stabilized urea minimizes urea volatilization and nitrate leaching, leaving more available nitrogen to turfgrass uptake. Use of controlled release nitrogen via U Flexx results in minimal surge growth and prolong colour response for up to 10 weeks. High potassium level assists turf in summer heat tolerance, winter cold tolerance plus disease resistance. Late fall / dormant winter applications result in carbohydrate production and storage which creates strong spring regrowth.
