### Micromax<sup>®</sup> Micronutrients

- **A powerful micronutrient formula that maximizes the growth potential of all plants grown in soilless media.**
- **The industry standard for essential micronutrient needs.**
- **Engineered for pre-plant incorporation into soil media to help you grow bigger, fuller plants.**
- **The efficiency potential of your present NPK program can be increased by using Micromax.**

Use a reputable laboratory such as the Scotts Testing Laboratory for more reliable media, solution and tissue test results to monitor your crop and insure your growing success.

### DESCRIPTION

This unique granular form of Micromax® is designed to increase the efficiency of the major nutrient program to maximize plant growth. Micromax® should be incorporated and can be used on all plants grown in artificial/soilless media. The homogenous nature of the product ensures each granular contains all the elements listed on the label for maximum consistency when mix properly.

Refer to the label for complete use information.
