

TerraLink pHortress 0-21-24

READ ENTIRE CONTAINER LABEL BEFORE USING THIS PRODUCT

GUARANTEED MINIMUM ANALYSIS:

TOTAL Nitrogen (N) 0.0%
 Available Phosphoric Acid (P2O5) 21.0%
 Soluble Potash (K2O) 24.0%
 Zinc (Zn) (Chelated)(actual) 0.20%
 0.20% Chelated Zinc
 Manganese (Mn) (Chelated)(actual) 0.20%
 0.20% Chelated Manganese

Derived from: Mono Potassium Phosphate, Potassium Hydroxide, Manganese EDTA, Zinc EDTA

This product should be used as a part of a complete fertilizer program. Plants will require additional sources of nutrients.

The user should seek advice of a professional in the industry regarding application rates.

SHAKE WELL BEFORE USING

SELLER'S GUARANTEE

Please obtain a Material Safety Data Sheet for more information.

To the best of the manufacturer's knowledge and belief the information contained herein is accurate and reliable as of the date compiled. However, the manufacturer makes no representation, warranty or guarantee as to the information's accuracy, reliability, completeness or timeliness. It is the user's responsibility to determine the suitability and completeness of such information for the user's own particular use or purposes. The manufacturer does not accept any liability for any loss or damage that may occur from any use of this information.

KEEP OUT OF REACH OF CHILDREN

CAUTION

This fertilizer contains Zinc (Zn) and Manganese (Mn) and should be used only as recommended. It may prove harmful when misused.

DIRECTIONS FOR USE

0-21-24 is compatible with most insecticides, fungicides, nematocides and liquid fertilizer. A compatibility test is recommended if the desired combination has not been previously used.

DIRECTIONS FOR USE

Mix the desired amount of pHortress in water before adding to the spray tank. With proper agitation running, add pHortress to the spray tank. Add pHortress to the spray tank before adding pesticides. Spray immediately after mixing. Do not store solution mixed with pesticides!

SUGGESTED USE RATES:

CROP	RATE/HA	NUMBER & TIMING OF APPLICATIONS
Alfalfa	3.5-7L/ha	Apply as soon as soil temperature reaches 55F at 6" and repeat after cutting as required.
Almonds, Pistachios	3.5-7L/ha	2-3 applications as required from post bloom to hull split.
Apples	3.5-7L/ha	2-3 applications starting at immediate post bloom through early sizing, including 14-21 days post harvest.
Apricots, Nectarines, Peaches	3.5-7L/ha	2-3 applications starting at blossom drop to early color, including post harvest. Use lower rates when fruit begins to color.
Avocados	3.5-7L/ha	Multiple applications as required.
Caneberries	3.5-7L/ha	Apply pre-bloom with subsequent applications at 30-90 day intervals or as needed.
Commercial nursery and ornamental plants	3.5-7L/ha	Apply after transplanting and repeat applications throughout the growing season at 30 day intervals.
Cranberries	3.5-7L/ha	2 applications, one each immediately post bloom and 21-30 days later.
Chicory	3.5-7L/ha	2-3 applications during the season as required.
Cherries, Plums, Prunes	3.5-7L/ha	2-3 applications starting at blossom drop to early color, including post harvest. Use lower rates when fruit begins to color.
Citrus	3.5-7L/ha	Multiple applications as required.
Cotton	3.5-7L/ha	2-3 applications from squaring to full boll development.
Cucurbit Vegetables such as: Cucumber, Cantaloupe, Watermelon, Squash and Pumpkin.	3.5-7L/ha	2-3 applications from bloom through fruit sizing.
Dry Beans Including: Kidneys, Pintos, Limas	3.5-7L/ha	2 applications, one each immediately pre-bloom and again 30-45 days later.
Grapes	3.5-7L/ha	2-3 applications from post shatter through early ripening.
Hops	3.5-7L/ha	3-4 applications from first runner through berry sizing as required.
Ornamental: Woody Plants	2.5-7L/ha	Multiple applications as required during growing season with one application after September 1st for winter hardiness.
Leafy Vegetables and Brassica (Cole) such as: Broccoli, Cabbage, Cauliflower, Celery, Lettuce (Head, Leaf, and Romaine) and Spinach.	3.5-7L/ha	Apply as required based on desired color and growth.
Onions	3.5-7L/ha	Multiple applications during growing season.
Pears	3.5-7L/ha	3 applications, one each at post bloom, 30-45 days pre-harvest, and 14-21 days post harvest.
Peppers, Tomatoes	3.5-7L/ha	2-3 applications from bloom to first color.
Strawberries	3.5-7L/ha	2 applications, one each at bloom and 21-30 days later.
Carrot, Potato, Radish, Rutabaga, Sugar Beet, Sweet Potato, Turnip and Yams.	3.5-7L/ha	
Turf Grass	100-200 ml per 100 sq. meters in a minimum of 10 litres of water.	2-3 applications during the season as required.
Walnuts	3.5-7L/ha	2-3 applications as required from catkin elongation until June 15th.

For aerial application use a maximum of 1 litre of pHortress per 40 litres of water.

Rates suggested are for standard spray volumes of 40-150 gal/acre. For higher volume sprays, rate should be adjusted. Caution: Store pHortress in temperatures between 5C to 40C and avoid extreme variations in temperatures. A reversible separation of ingredients may occur after long storage, this however does not affect the quality of effectiveness of the product.

DO NOT COMBINE WITH COPPER SPRAYS AS PHYTOTOXICITY CAN OCCUR. Terralink pHortress may be mixed with lower recommended rates of lower bluret urea.

Use caution when applying to fruiting crops in combination with pesticides and/or surfactants. Use minimal effective rates of stickers during ripening. Do not use high analysis organo silicones or high analysis non-ionics during ripening. Avoid application to fruit at elevated temperatures (>95F). Avoid applications to crops under environmental stress or post pressure. Maximum effectiveness will be obtained when applied early in the morning or after dusk.
