## **ON TARGET**

### **DEPOSITION AID / DRIFT RETARDANT**

#### **ACTIVE INGREDIENTS**

Polyvinyl Polymer (Polyacrylamide) 30%  
Inert ingredients 70%

#### **CAUTION**

##### **KEEP OUT OF REACH OF CHILDREN**

Avoid eye and skin contact. Avoid ingestion, breathing vapours or spray mist. Use protective clothing.  
NOTE: Read and follow all label directions and cautions on all products used.

#### **STATEMENT OF PRACTICAL TREATMENT**

**If inhaled:** Remove to fresh air, treat symptomatically.

**If swallowed:** Drink several glasses of milk or water. **DO NOT INDUCE VOMITING.** Call a physician immediately.

**If on skin:** Wash with soap and water. If irritation develops, consult a physician. Remove and launder contaminated clothing before reuse.

**If in eyes:** Flush with water for at least 15 minutes. Seek medical attention if irritation persists.

**EMERGENCIES:** For chemical spill, leak, fire or exposure call (613) 787-5620.

#### **GENERAL INFORMATION**

**ON TARGET** is an effective, easy-to-use compound for deposition improvement and drift retardation in spraying operations. It is compatible with most water soluble and wettable powder pesticides and desiccants when applied by aerial application or standard ground equipment.

#### **DIRECTIONS FOR USE**

Important: Keep container closed in storage. Do not allow water to come in contact with contents until added to the spray solution.

**Step 1.** Select correct dosage from chart below.

**Step 2.** Fill mix tank with water, pesticide and other additives and begin to agitate.

**Step 3.** SHAKE BOTTLE WELL BEFORE USING.

**Step 4.** For best mixing results, either (1) inject **ON TARGET** liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add **ON TARGET** liquid to the rapidly agitating tank mix in the area of highest turbulence by pouring a very thin stream.

**Step 5.** Continue to agitate mix tank for at least 2 minutes before spraying.

**Step 6.** Follow all cleanup precautions on label. Follow governmental procedures for disposal of pesticide spray solution.

NOTE: The degree of drift hazard varies with the type of pesticide, application conditions, and vegetation near the sprayed area. Consult your local agricultural advisor. Remember, pesticide drift is no accident. Common sense and sound application technology must be followed when spraying pesticides. **ON**

TARGET will retard or reduce but not totally eliminate drift.

#### ON-TARGET DOSAGE CHART

Spray pressure	Nozzle orientation	Dosage (per 100 L)
Aerial applied below 45 psi	Straight back	15-50 mL.
	45o angle back	30-60 mL.
Ground application	flat fan, flooding	10-30 mL
Low (below 30 psi)	off-centre	25-40 mL
Medium (below 30-50 psi)	flat fan, flooding	25-30 mL
	off-centre	30-50 mL
	spray guns	40-60 mL
High (over 50 psi)	spray guns	60-250 mL

For home and garden sprayers, use approximately 30 mL of **ON TARGET** per 20 L of spray solution.

#### STORAGE AND DISPOSAL

PROTECT FROM FREEZING. Store above 0°C. Do not reuse empty container. Dispose of container in a safe manner in accordance with federal, provincial and local regulations.

WARRANTY Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
