

# TerraFog Carrier Concentrate

TerraFog Carrier is a required additive when fogging fungicides, insecticides, disinfectants, and nutrient compounds through Mister Max or Mister III style fogging units.

TerraFog Carrier has been formulated to assist in fog dispersal, and to improve particle size and uniformity. Once fogged, TerraFog Carrier produces a white haze that allows the applicator to determine the current state of chemical penetration through the crop.

It is recommended that TerraFog Carrier be used at a rate of 10-15% of the volume of your formulation tank. Additionally, it is also recommended that between 2.4 and 3 litres of TerraFog Carrier be utilized per Hectare of enclosed greenhouse space. Growers should note that in order for fogging applications to work successfully, greenhouse vents must remain closed. It is therefore recommended that fogging with TerraFog Carrier only be done during evening or overcast conditions where greenhouse ventilation can be minimized.

MANUFACTURED EXCLUSIVELY FOR:

464 Riverside Road South  
Abbotsford, B.C. V2S 7M1

## TerraFog Carrier Concentrate

### WARNING

Corrosive.  
Causes burns to eyes,  
skin and respiratory  
tract.

Avoid contact with eyes  
and skin. Avoid inhalation.  
Wear butyl or nitrile gloves,  
eyeglasses, protective  
clothing and an organic  
vapor respirator.

If in contact with skin,  
wash with soap and water.  
If in contact with eyes,  
flush with water for 20  
minutes. If inhaled remove  
to fresh air. If irritation  
persists, consult physician.

SEE MATERIAL SAFETY  
DATA SHEET

### ATTENTION

Corrosif.  
Provoquer des  
brulures aux yeux,  
de la peau et des voies  
respiratoires.

Eviter le contact avec  
les yeux et la peau. Eviter  
l'inhalation. Portez des gants  
de butyle ou de nitrile, des  
vetements de protection, les  
lunettes de protection, et  
un respirateur de vapeur  
organique.

Contact avec la peau: laver  
au savon et a l'eau. Contact  
avec les yeux: rincer  
abondamment a l'eau durant  
20 minutes. Inhalation:  
placer la victime a l'air libre.  
Si l'irritation persiste,  
consulter un medecin.
