

Coastal General Revegetation Mix

- Coastal
- All purpose
- Adapted to most soil types

For: • *General revegetation*

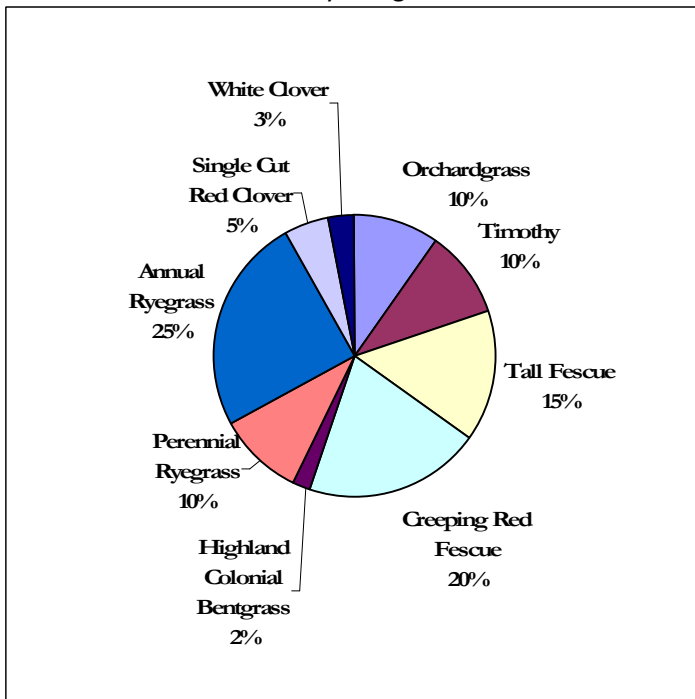

The **Coastal General** revegetation mixture is an all-purpose mixture adapted to all coastal soils and climates.

This mixture does well when seeded at altitudes of 0-3500 feet in areas with an average rainfall of 25+ inches.

Coastal General should be seeded at 50-100 pounds per acre, depending on seeding conditions and desired growth density.
