BroadStar™
HERBICIDE

Prevent broadleaf weed growth with this broad spectrum control for tough and resistant weeds. Offers long residual control for outdoor ornamentals and container nursery growers. Granular formula is easy to apply.

SureGuard
HERBICIDE

Control many broadleaf and grassy weeds with SureGuard. Longest residual control of at least 8-12 weeks. Spring and Fall applications to conifers and deciduous trees. Spray can be tank mixed with Glyphosate for superior knockdown. For use in outdoor ornamentals, bareground and landscapes.

Osmocote PRO
With fusion technology

Growing in windy conditions? The No-Spill Prill with Fusion Technology stays where you apply it! After watering in, the prills bind to each other and the soil surface. Reapplication is minimized which reduces additional fertilizer and labor costs.

florikan
controlled release fertilizers

Florikote Topdress formulation designed to green up plants in the spring making them more appealing for Spring Sales! Staged Nutrient Release developed in conjunction with NASA. Keep your plants healthy with a consistent source of nutrition.
