

High Wire Variety Recommendations for 2010/2011

Winter/Spring Crop

Mystica RZ

Excellent first crop selection. PM susceptible. High production with nice sized fruit. Vigorous grower, even in low light. PMS

Proloog RZ

High Production in winter, spring and fall with good sizing. Sensitive to warm night in summer. Slow starter but balanced plant with high yields. Medium tolerance to mildew.

Curtis RZ

A variety that continues to do well in winter planting. Excellent quality fruit with high tolerance to mildew.

Cadence (24-176) RZ

High wire cucumber variety very high in production. High tolerance to mildew so worth a trial in winter of 2011. Even fruit size from beginning of crop to end due to good balance on plant. Fruit do not get too long towards the end of crop. CMMVIR

Spring/Summer/Fall Crop

Demmarage RZ

High production in summer. Can be short to start but piece count very high. Excellent quality fruit and the plant has good balance. Medium tolerance to Mildew.

Proloog RZ

High Production in winter, spring and fall with good sizing. Sensitive to warm night in summer. Slow starter but balanced plant with high yields. Medium tolerance to mildew.

Cadence (24-176) RZ

High wire cucumber variety very high in production. High tolerance to mildew so worth a trial in winter of 2011. Even fruit size from beginning of crop to end due to good balance on plant. Fruit do not get too long towards the end of crop. CMMVIR

Mini Cucumbers

Picowell RZ

Picowell is the highest producing mini cucumber variety. It gives consistent size and the harvest area is compact with 3 fruit per internode. High tolerance and a strong root systems allows for year round production.
