2018 TerraLink Corn Trials

Promising Results with Soybeans

There have been some promising results with soybeans in TerraLink's 2018 Corn Trials.

The soybeans were planted between the 30 inch rows of corn (BMR 345) at a seeding rate of 30,000 seeds per acre. No fertilizer was added at planting with the soybeans. At harvest time, no yield drag on the corn was noticed, and a yield of 4.58 tonnes (wet) of soybeans were harvested in addition to the corn. When harvested, the soybean plant resembles alfalfa in appearance and is very similar in feed analysis.

These results show that we were able to harvest 4.5 extra tonnes of top quality forage in addition to the corn crop. Planting soybeans between the rows of corn could significantly increase the total forage yield per acre.

Soybeans are now available through TerraLink. For more information, please contact Duncan Reid - Sales Manager Dairy/Forage/Ranch (604-308-2134).

This chart shows the findings in more detail.

	%	%	Wet	% 30 HR	% Dry Matter		
Hybrid	Dry Matter	Moisture	Tons	NDFD	Oil	Protein	Starch
BMR 345	32.2	67.8	26.2	67.0	2.8	8.2	29.4
BMR 345 and Soybean	30.9	69.3	30.0	64.5	3.0	10.6	28.0
Soybean	29.1	70.9	4.58	56.4	3.7	17.6	14.3

TerraLink

Agri Plastics

We Have the Plastics for You!

TerraLink is your one-stop-shop for all your agri plastics needs. Our staff is experienced and knowledgeable, and we are always just a phone call away. We have convenient warehouse locations in Abbotsford, Rosedale and on Vancouver Island. We only sell high quality products made from Canadian and internationally made plastics, at competitive pricing. We also offer excellent product support and a great selection of sizes that are available throughout the growing season. Custom sizes are available as special order items.

Check out www.tlhort.com for more product information, or call your sales representative today.

Announcement

Now Partnering with Pioneer Canada

TerraLink is proud to announce that we are now the exclusive Pioneer® and Brevant™ distributor for the Fraser Valley and Vancouver Island.

Pioneer® brand products deliver improved seed genetics to farmers around the world. With business operations in more than 90 countries, Pioneer develops and distributes high-quality corn, soybeans, and other seed, as well as forage additives, and a variety of services and expertise. A demonstrated partner to farmers around the world, Pioneer is committed to increasing food production with high quality Pioneer® brand products and agronomic knowledge that maximizes agricultural productivity.

Pioneer® and Brevant™ are trademarks of Cortova.
