

Landscapers & Lawncare:

Roddick Fertilizers, the new TerraLink LADNER location.

About Roddicks:

Noel and Val Roddick have been serving the farming community in the Fraser Valley for over forty years. Noel Roddick graduated from UBC in 1962 with his Bachelor of Science in Agriculture. It is here he met and later married his wife Valerie. They purchased property on Westham Island, started a fertilizer business in 1971, then purchased the BC Sugar Beet Seed plant in 1980 which is now the current location.

Noel's main business focus has always been custom fertilizer blending and application as well as grain sales. Along with the fertilizer business Roddick serves a variety of related agriculture services such as seed cleaning, soil testing, leaf (tissue) samples and analysis which go hand-in-hand with custom fertilizer recommendations. Noel has worked very hard to minimize the environmental impact of the use of fertilizer, by targeting placement of the nutrients so they are readily available to the plant. Changing the placement and timing of the applications permits using less amount of product to grow a healthy,

happy plant. Noel has not only seen many changes over the years but has worked hard at pioneering changes for the best of the environment.

Noel has always had a love of horses and this hobby is what got them started in a small Feed and Tack store on the property. This little store in the country is now home to landscape and lawncare supplies (fertilizer, lime, grass seed and organics), feed for all your family pets including a diverse line of horse feed, hay, tack, and of course dog and cat food. We also carry many other items such as chicken feeders, bird food, and rodent control items. Come down to Roddick's and discover the hidden gem in the Delta.

Organic Products

(Natural or Organic does not always mean Certified Organic)

Garden/Lawn Products
