Changing with the Times

Bringing Landscapers a Full Line of Conventional and Organic Products

Recent municipal bans on cosmetic use of pesticides and the trend towards Natural and Organic solutions for fertilizer and pest control needs have become main stream in the modern world. The result of this change in the landscaper marketplace now requires a full line of both Organic and Conventional products to meet everyone's needs.

TerraLink is in step with the times bringing more high quality Natural and Organic fertilizers and pest control products to the market and offering them together with our already extensive line-up of Conventional products.

This edition of the Landscaper provides a listing and information on many of our new and exciting products. Our goal is to provide you, our landscaper customer, with the goods you need to satisfy your customers' need to 'Go Green' whenever possible and create a beautiful outdoor living space in an environmentally friendly way.

For more information on TerraLink's products and services please go to our website at www.tlhort.com or call us at the contact numbers below.

Two Locations to serve you better

In Sync with Nature

Natural Products New for 2010

Amaizeingly Green™ - 100% Natural Corn Gluten Meal Weed n' Feed

Amaizeingly Green™ is the only company in Canada that manufactures corn gluten meal specifically for lawn & garden care!

Amaizeingly Green™ Turf Fertilizer 10-0-0 Weed n' Feed is made from 100% corn gluten meal and is registered as a pre-emergent herbicide fertilizer to control large crab grass and dandelions. The product is pelletized for easy application using any conventional spreader.

A favourite already:
Groundskeeper's Pride (Organic Listed)
10-3-3+Iron
25 kg bag

Lime the way it should be:

NATURE'S INTENT

50 lbs bags

- **Dolopril**
- **Calpril**

One bag covers 4,000 sq.ft.

See inside for more natural products 

Effective & Convenient

Conventional Products

When used correctly, conventional fertilizer products are not harmful to the environment. Conventional fertilizers should not be lumped together with chemical pesticides when considering things like safety to people and the environment. Applied properly, conventional products are easy to use, proven effective while applying much less actual product, and they green things up quickly in most weather conditions.

Moss Control 9-3-6

Contains Iron Sulphate to effectively eliminate moss. Apply more than once for maximum effectiveness. Apply 10 lbs/1,000 sq.ft.

20 kg bag

Spring All Purpose 18-18-18

With 50% Methylene Urea for slow release nitrogen. Has higher P and K to get healthy growth. Apply 5 lbs/1,000 sq.ft. to lawns.

25 kg bag

Spring Starter 16-32-6 with 50% UFLEXX

High phosphorus to get roots growing in cool soils. Apply 5 lbs/1,000 sq.ft. **25 kg bag**

Keep It Green & Healthy All Spring & Summer with 23-3-23

With 55% UFLEXX stabilized nitrogen. Apply 4 lbs/1,000 sq.ft. to lawns. **25 kg bag**

Standard Weed n' Feed 19-2-18

Gain control of nasty weed areas this year with 19-2-18 W&F. Apply at 5 lbs/1,000 sq.ft. **25 kg bag**

Water Soluble Fertilizers

TerraLink features Technigro products.

- 10-30-20 Blossom Booster (**25 lbs bag**)
- 20-20-20 All Purpose (**25 lbs bag**)

Technigro products are high quality, highly soluble and are featured in products in the demanding agricultural and horticultural markets. Effective in landscape uses as well.

Natural source mined product. **25 kg bag**

Kelp Meal

Kelp products from Acadian Seaplants.

25 kg bag

Amaizeingly Green™

Natural Lawn Care Products

Made from Corn Gluten Meal

Scientific research by Iowa State University found that corn gluten meal contains pre-emergent herbicidal properties and is a non selective seed germination inhibitor. Amaizeingly Green™ has Dry Granular and Liquid formulations which have some of the highest active ingredients in the Canadian marketplace today.

Amaizeingly Green™ 10-0-0

Amaizeingly Green™ 10-0-0 has taken pre-emergent herbicide to the next level. It is specifically manufactured for lawn & garden care and has an industry leading nitrogen content with 10% total N. It is formulated for use on established lawns and gardens. Apply in early Spring when the soil temperature reaches 12°C or before Dandelion and Large Crabgrass seeds have germinated. Apply again in Mid Summer and Early Fall at a rate of 20lbs per 1000 sq. ft.

Amaizeingly Green™ 9-1-1 Turf Fertilizer with Kelp

Increases resistance to drought, fungal disease, stabilizes chlorophyll and adds micro-nutrients.

Amaizeingly Green™ 8-1-1 Turf Fertilizer with Neem Cake

Helps to reduce alkalinity in soil, improves soil ecology and fertility and assists with soil texture, water holding capacity and aeration.

Amaizeingly Green™ Liquid Corn Gluten

- For liquid fertilizer programs.
- Covers more area than dry products.
- Addition of water soluble fertilizer optional.
- Shelf life 60 days. Effective to use.

LAWN CARE AND TURF MANAGERS: CALL NOW FOR THE NEXT BOOKING PROGRAM OPPORTUNITY!

Amaizeingly Green™ products are PET safe, WILL NOT BURN YOUR LAWN and can be used in ENVIRONMENTALLY SENSITIVE AREAS.

- **Do not use on recently seeded areas as corn gluten may inhibit seed germination.**
- **Apply in spring and again in summer or fall when soil temperature cools.**

Natural

Pest Control

NATURAL OR ORGANIC USE	TREATMENT
Dormant Oil (10 L)	dormant spray on woody plants
Lime Sulphur (10 L)	fungicide, insects & mites
Opal 47% Potassium fatty acids (10 L)	insecticidal soap; more broad spectrum than other similar products

Richardson Seed

Grass Seed for Lawns & Turf

Featuring Richardson Seed products, "BC's most trusted, professional line of lawn and turf grass seeds".

Overseeding Mix:

Perennial ryegrass blend to rejuvenate a tired lawn.

Deluxe Lawn Blend:

A blend of premium varieties selected for BC.

All Purpose Mix:

Standard varieties for any situation.

Sun & Shade Blend:

Includes special fescues and ryegrasses for shade tolerance, bluegrass for sunny areas.

Low Maintenance Grass Blend:

Lower growing and less cutting/maintenance, especially in summer.

WaterWise Grass Seed Formulation:

Good for lower water use, has drought resistance, slower growing.

Available in 22.7 kg, 10 kg or 5 kg bag sizes. Please inquire.

Application rates vary but generally 5 - 7 lbs per 1,000 sq.ft. applies.

Lawn Care

Beyond Cutting The Grass

Beyond cutting the grass every few days, your customers are paying you for a beautiful greenspace. Living in the hub of the green movement you are also likely to be asked to provide it organically. For those who have cut their teeth on a 'weed and feed' and synthetic fertilizer diet, an organic program sounds somewhat daunting. It is easier than you think.

Terralink has been providing products and services to organic producers for over 20 years. As such we have a full line of certified organic,

all natural, and organic based products suitable for the turf and landscape markets. What's more, we have 'feet on the street' technical staff to answer your questions and put together an organic program which delivers predictable results without breaking the bank.
