

## The Earth-Friendly Approach with EarthLink

In 2010, TerraLink Horticulture Inc. introduced the EarthLink product line as another choice for lawn care and landscape specialists working in the residential and strata markets. Public pressure has caused government bodies across Canada to react by instituting cosmetic pesticide bans. Recognizing that these actions leave lawn and landscape professionals with less choices, TerraLink responded by using sound science to develop alternative and safe solutions to conventional products.

**EarthLink** is a collection of products that:

- Are organic alternatives to conventional products
- Support sustainable horticulture.
- Include more natural and organic-based ingredients.

## EarthLink products your lawn care and landscape specialists may use:

- **TerraLink Brand** Organic Lawn & Landscape 7-4-7. All purpose mix blended from feather meal, bone meal and naturally mined sulphate of potash.
- **Amazingly Green Products:** corn gluten based fertilizers. 100% natural, safe for the environment and are child and pet safe.
- **Safegro** 10-3-3. Granulated slow release fertilizer specifically formulated for lawns. Blended with feather meal, blood and bone meal and naturally mined sulphate of potash.
- **TerraLink Brand** 10-10-12 + micros, 70% Organic Based. All purpose blend with secondary and micro nutrients.
- **EarthLink** Liquid Organic Fertilizers: fish-based liquid blends provide immediately available nutrients. Triple-filtered fertilizer can be applied through irrigation systems. Three blends available: 4-0-2, 2-4-0.5 and 2.6-0.5-5.
- **EcoFert** Plant-Based Liquid Organic Fertilizers: produced from fermentation of plant material, EcoGrow 3-3-4 and Ecobloom 2-4-5 have been fortified with polyamines, amino acids, vitamins and plant hormones. Contain magnesium and calcium as well.
- Straight Rock Phosphate, Bone Meal, Feather Meal, Kelp Meal.

## EarthLink environment-friendly pest controls:

- **Sluggo** Slug & Snail Bait. 100% natural, iron phosphate-based. Does not contain toxic metaldehyde. Child and pet safe.
- **Amazingly Green** Weed n' Feed. Corn gluten-based liquid with 10% nitrogen. It won't burn the turf and is completely child and pet-safe.
- **Munger Horticultural Vinegar.** Organic alternative to weed control.
- **Fiesta** Lawn Weed Killer. This iron-based weed killer is effective and does not contain traditional phenoxy active ingredients.
- Biological controls, such as parasitic nematodes for use against European Chafer, leatherjackets and weevils.

Earth-Friendly Choices

## TerraLink

Sound Science,  
Safe Solutions™.

TerraLink is a full service horticulture supply company serving the needs of growers in British Columbia since 1973. Starting out as a supplier to dairy farmers and berry growers, the last 20 years saw the company expand to become specialists in the greenhouse, turf, ornamental, forestry and home garden markets. The ever changing face of horticulture is reflected in TerraLink's current offering of nutrients and plant protection. TerraLink is the industry leader in providing expertise and products for conventional or organic production.
