

For Explosive Vegetative Growth

Manufactured through fermentation of plant materials, plant by-products and mined minerals EcoGrow provides excellent plant growth in all crops. EcoGrow contains readily available macro nutrients Nitrogen, Phosphorous and Potassium in high amounts and sufficient amounts of Calcium and Magnesium which any other organic fertilizer has not mastered. In addition, it is fortified with polyamines, amino acids, vitamins and plant hormones which are secreted during the thermophilic microbial fermentation.

BENEFITS OF USING ECOGROW:

1. Promotes healthy vigorous growth in all crops
2. Creates lush green leaves
3. Produce strong plant structure
4. Maximizes final yield and overall quality of the final product
5. Builds pest and disease resistant
6. No salt build up in the medium
7. Helps to build up beneficial microbes in the root zone

GUARANTEED MINIMUM ANALYSIS:

Total Nitrogen (N).....	3%
2.98% Water soluble organic Nitrogen	
0.02% Ammoniacal Nitrogen	
Total Phosphorous (P ₂ O ₅)	3%
Soluble Potassium (K ₂ O).....	4%
Sulfur (S).....	3%
Available Calcium (Ca)	2%
Available Magnesium (Mg).....	1%

HOW TO USE:

1. **For seedlings:** 5 ml of EcoGrow into 1 litre of water (4 tsp in one gallon) and apply as a drench every day if the seedlings are in soilless medium/hydroponics system. If the seedlings are in soil based medium apply once in every other day.
2. **For young developing plants:** 8 ml of EcoGrow into 1 litre of water (6 tsp in one gallon) and apply as a drench or a spray in every day if the plants are in soilless or hydroponics medium. If the plants are in soil based medium apply as a drench once in every other day.
